CO-OP Brain Injury Supports

Community Living

CO-OP's qualified staff provides community living support to people with brain injuries, providing a comfortable and secure home life while promoting independence and opportunities for rich life experiences.

Day Center

CO-OP's Day Center provides an array of interest-based social and recreational activities where individuals can also receive needed therapeutic services. The focus is on providing access to community resources and enrichment of life quality.

Employment Services

Employment services are available for those interested in exploring work opportunities.

Clinical and Support Services

A variety of clinical services such as speech and communication, occupational, and physical therapies are available to help individuals fully participate in their communities.

Health Care Services

Skilled and caring healthcare professionals oversee a wide array of health and wellness services, including the management and distribution of medication and implementation of treatment protocols for individuals with complex medical needs.
